TITLE

Light Compaction

OVERVIEW

Bobcat is dedicated to breaking down your barriers to productivity and profit with a tough lineup of light compaction equipment. Our reversible plate compactors (three models), forward plate compactors (three models), rammers (two models) and the mighty TR75 trench roller are powerful, robust, easy to operate and simple to maintain. The design advantages built into every Bobcat® light compaction machine help operators accomplish more with less effort.

Make short work of a wide range of material compaction tasks - on all terrain types - with versatile Bobcat light compaction machines.

Watch: New Light Compaction Lineup

EQUIPMENT TYPE

Compact Equipment

ADDITIONAL INFORMATION

Light compaction equipment is **a piece of machinery used to compact soil to strengthen and stabilise it**. In this technique, a huge roller is typically used to roll over an area that has loose materials
